

## Project Fact sheet

**Customer:** DM Civil

---

**Project:** 250mm Bunbury to Margaret River pipeline

---

### Project Detail

**Brief description of this project:** Installation of 530PE sleeve with 250mm internal water main.

#### Outline of Diversified Scope of works:

- Construction of 530PE and internal 250PE water pipe in a rural type environment.
- Drill and staged ream 350-550 with final 780mm.

**Specific Project Obstacles to overcome:** The Bunbury to Margaret River build route required a high level of project management working closely with DEC due to endangered native flora along project route, wetland and high level of Tiger snakes bite potential.

Diversified managed multiple stakeholder requirements, including cable route land owners, council, DEC and Main Roads.

This project was delivered on time on budget.

**Diversified Innovations:** Utilisation of the Ditch Witch JT3020 All Terrain with a staged ream 350mm-550mm and final 780mm.
